Docket No. :	1351.01	
Customer No.:		
For:	System for Utilizing Vacuum Tubes in Computer Audio Circuitry	

DECLARATION UNDER 37 C.F.R. 1.131

Hon. Commissioner for Patents
 P.O. Box 1450
 Alexandria, VA 22313-1450

Sir:

I, Louis I. Memran being duly sworn, depose and state:

1. I am the Applicant of the within Application and the sole inventor of all claims thereof ("the invention"). This declaration is filed in support of the above referenced application.

2. I first conceived the present invention, that is, a system for utilizing vacuum tubes in computer audio circuitry, on or about March 1998.

3. Thereafter, on or about April 1998, I began actively pursuing reduction of said invention to practice.

4. By Late 1998, I had developed circuit diagrams for the invention and furnished a copy of them to one Eric Buchwald, a businessman in Florida who, at about this time, I enlisted to help me market my invention.

5. I believe I reduced said invention to practice in or about January 1999 by constructing a working computer audio system which used vacuum tubes in series with an output of a sound card of a computer.

6. Eric Buchwald and I, working with a James Mann, formed a corporation, Compu Tube, Inc. in Florida on September 18, 2000 to actively market said invention. A copy of the registration information is attached as Ex. A herewith.

7. On November 1, 2000, I filed my Provisional Application Serial No. 60/245,285 directed to the invention, which was converted to Utility Patent Application No. 10/002,382 on October 20, 2001. These applications reflect my invention as conceived in 1998 and reduced-to-practice in 1999.

8. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
